

# Xtreme™

## Pallets designed for rugged re-use & available in a variety of footprints.

Designed for rugged, re-use in harsh environments, these pallets are engineered with our patented Long Fiber Reinforced Thermoplastic process, making them able to withstand heavy loads. Available in a variety of footprints, **Xtreme** pallets won't break, warp, split or absorb contaminants assuring your materials are kept safe and free from harm. Custom designs are available to accommodate your specific application.

**ETC** COMPOSITE  
TECHNOLOGIES

*Yesterday's plastics molded for tomorrow's solutions.*

## Reusable Nestable and Stackable Plastic Pallets

### FEATURES

- Rugged construction for long service life
- Single-piece / solid body design
- Uniform tolerances for use in automated handling systems
- Slip-resistant deck surface
- Space saving, 9-legged nestable design
- 4-way fork-lift / hand truck entry
- Available in many custom sizes
- Compatible with grocery twin-sheet pallets
- Returnable, reusable and recyclable

### OPTIONS

- Your company name and logo molded permanently onto the pallet
- Perimeter lip on top deck (not available on all models)
- In-mold labeling and bar coding
- Wide range of colors available
- Painted outer edge for safety/identification
- Hot Stamp available
- Plastic tier sheets for aid in stacking product
- Snap on 3 runner system to convert pallet to stackable (available at this time on our OCD/CD units)
